Cleasby Conveyors (Rev. 04/28/00)

# SAFETY AND WARNING LABELS

## Labels Placed by Manufacturer

Cleasby Conveyors (CM) places a number of warning labels on the conveyor and turntable to warn of dangers and to remind operators of correct operating procedures.

---

### WARNING LABELS

The warning labels contain important warning information. Keep them visible and do not remove them.

---

Instruct operators to review the warning labels daily as they start to make their deliveries. This daily review of safety precautions will help your operators be more safety conscious, reducing hazards to themselves, and to others who may work near the conveyor.

Use care when cleaning to avoid damage to the warning labels by strong solvents or steam. Mask each label carefully before painting the unit. If the labels become damaged or unreadable, replace them promptly.

## Labels to be Placed by You or Your Installer

1.) Truck Cab Label. In addition to labels pre-installed on turntable and conveyor, Cleasby Conveyors provides two warning labels to attach to the dash of the truck (See #13 and #15). Mount these labels in clear view of the operator, and protect them from damage as described above.

2.) Truck Bed Label: Cleasby Conveyors also provides five (5) warning labels (see label #14 and #20) that must be placed at certain locations on the truck bed (See reference drawings for truck decal placement). These labels are 5 3/8 inches deep, so if the truck on which you are installing the conveyor is not thick enough to allow for good placement of these labels, mounting brackets for the labels are available from the manufacturer.

## Diagrams:

Following are various figures depicting the turntable and conveyor. Cleasby has pre-installed labels on the actual turntable and conveyors of which the figures are representative. Leader lines or arrows on the diagram designate each label's identification number and proper location on the equipment.

At the time of delivery to you (and periodically thereafter) look at the equipment with the manual in hand, checking each label in turn until you are satisfied that all labels are there, and that they are all positioned as specified in the manual.

---

## NOTE

Additional labels and truck bed mounting brackets are available free of charge. Call your local dealer, service center or distributor. If there is no dealer in your area, call Cleasby Conveyors (800) 453-2446.
